

Are you (considering) premed?

Are you  
(considering)  
majoring in the  
sciences?

Are you  
(considering)  
majoring in the  
humanities?

...Because you think  
that's what premeds  
do, but really have no  
passion for  
translation of ebola  
DNA or the  
development of  
multiscale models for  
molecular systems  
embedded in dielectric  
continuum?

...Because you find  
the fields of  
chemistry, biology,  
or engineering  
fascinating and/or  
are interested in  
potentially pursuing  
a future in  
research?

DO YOU LIKE  
INDIAN FOOD?!

BUT

COME TO OUR COOL PANELIST DINNER DISCUSSION

- hear about some other cool and interesting premed possibilities!!!
- learn about alternative options and what others feeling like you might have decided to do
- eat delicious Mehek
- CHOW DOWN WITH COOL PREMEDS AND COOLER MED STUDENTS!
- It's FOR and FEATURING people JUST LIKE YOU!

**Time & Date:** Tuesday, October 7, 7:30PM

**Location:** Campus Club

**Dinner provided! Indian food from Mehek!**

Introducing our awesome panelists...

**Eric (Ricky) Silberman '13** graduated from Princeton in 2013 with a AB in Molecular Biology and certificates in Creative Writing and Judaic Studies. After graduation, he served as a Fulbright grantee in Warsaw, Poland, where he was based at the Museum of the History of Polish Jews and wrote fiction and nonfiction about the contemporary Polish-Jewish experience. He is currently a first year medical student at Icahn School of Medicine at Mount Sinai.

**Sandra Fong '13** is a second year student at the Icahn School of Medicine at Mount Sinai. A 2008 Olympian and Anthropology major, she was offered admission to Mount Sinai in her sophomore year through their Humanities and Medicine Program. This allowed her to pursue her diverse interests in film, theatre, journalism, and cultural studies while attending Princeton. Prior to matriculating at Mount Sinai, she also worked as an associate producer at Pureland Pictures.

**Cindy Kroll '11** was a concentrator in the Department of Spanish and Portuguese Languages and Cultures. While at Princeton, she interned with Child Family Health International in La Paz, Bolivia through the International Internship Program. After graduating, she also worked in a public health clinic and two schools in Parramos, Guatemala through Princeton in Latin America. She is now a third year medical student at Cooper Medical School of Rowan University in Camden, NJ.

**Lisa Einstein '13** graduated from Princeton with a BA in Physics and a minor in Dance. Interested in medicine since high school, she spent time even then interning and volunteering at hospitals and medical centers. Upon arriving to Princeton, she pursued this interest by enrolling in the integrated science program, but her priorities shifted when she had the opportunity to dance professionally with her dream company. While completing her studies at Princeton, she performed with this company at top venues around the country. Since graduation she has been performing, volunteering, and tutoring physics and math. Her deep love of humans, science, service, vulnerability, teamwork and bodies has lead her back to medicine.

*Come hang out with Princeton's Premeds Without Borders, nom on naan, ask the questions you've been pondering about non-traditional routes to medical school (or about the process in general!), and network with your premed peers & predecessors!*
